

PUBLIC NOTICE OF INCREASE IN WATER & SEWER RATES

Rate Increase Begins June 1st

The City Of Brownsboro, like many other utilities around East Texas is facing rising cost to maintain and has a need to improve its aging water system.

Improvements needed include replacing 70+ year-old pipelines, looping dead-end water mains, upgrading pumps to bring water from its source to your home, and maintaining water quality to ensure clean, safe, drinking water.

Over the last few years, the City Council has worked with staff to minimize rate increases by reducing operational costs, utilizing reserve funds, deferring maintenance and improvement projects.

Before even considering this water rate increase, the Board continued to reduce costs and each employee is doing their part to trim costs are part of their annual goals. Nevertheless, there are day-to-day operational costs that continue to rise, especially in the areas of materials, fuel, and chemical treatment.

The rate schedule presented in this notice is based on using water rates to fund capital improvement projects to improve the water system as well as for operation and maintenance costs.

Water Monthly Minimum	30.00
	Cost Per Tier
0-2000	3.50
